CHARGING | HOLDING LOOSE LABELS

There are many applications where a loose item is added to a moving product. It could be a label, an advertising insert, operating instructions etc.

7160 Generator Bar

IONFIX Compact Static Generator

7160 Static Generator Bar

Loose labels may be put onto packages before wrapping. Static is used to stick the label to the package so that it does not move.

It the static generation is not used to hold the “label” to the product, there is a risk that it will slide off. Using electrostatics is simple, clean, controllable and low cost.

On this high speed Müller Martini magazine line a 7160 Static Generator Bar is used to hold address labels to magazines as they are packed into plastic mailer envelopes. The red arrow show the position of the 7160 Bar.

An IONFIX Compact is the ideal Static Generator for this application.

A 660 Brush can be the counter electrode.
