IONFIX Compact Static Generator

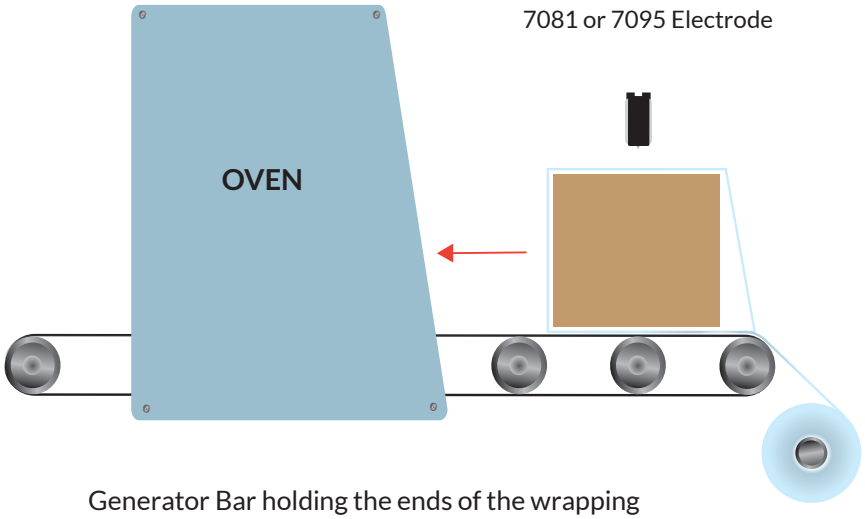

7095-12

7090

Shrink Wrapping machines use static generators to hold the two ends of the film together as the carton or product goes into the shrink tunnel.

Generator Bar holding the ends of the wrapping film onto the product or carton.

There is a choice of compact electrodes which can be used in this application - from the tubular 7080 to the linear 7095 Series. The IONFIX Compact will have all the power and control needed for this application.
