HP 4:1 CONNECTOR BOX

The HP 4:1 Connector Box allows the operator to have a cable disconnect feature anywhere in the cable system.

For use with Fraser HP Connectors at up to 6 kV.

ESSENTIAL QUALITIES

- Versatile 4 into 1 cable connector allows customer to:
  - have cable distribution closer to application.
  - have a cable disconnect between the power unit and static eliminators.
  - power more static eliminators from one power unit (subject to maximum load).
- Weight with 2 m cable: 800 g.

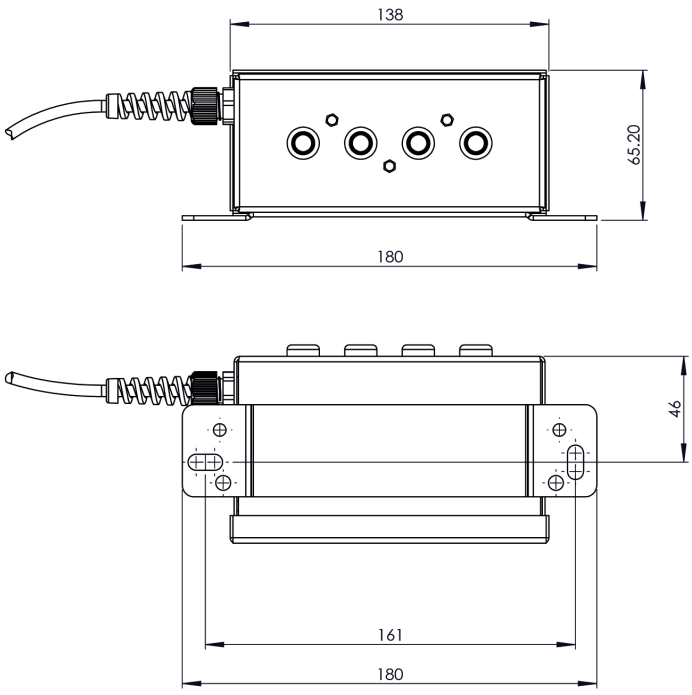

CONNECTIVITY AND CONTROL

- For use with Fraser HP Connectors on 5.5 – 6 kV systems.
- 2 m of hardwired mains cable, unless otherwise ordered.

APPLICATIONS

- The power unit must be switched off before connecting or disconnecting a cable.
